PREFACE

1. This Career Field Education and Training Plan (CFETP) is a comprehensive education and training document that identifies life-cycle education/training requirements, training support resources, and minimum core task requirements for this specialty. The CFETP will provide personnel a clear career path to success and instill rigor in all aspects of career field training.
2. The CFETP consists of two parts; both parts of the plan are used by supervisors to plan, manage, and control training within the career field.

2.1. Part I provides information necessary for overall management of the specialty.

- **Section A** provides general information about how the CFETP will be used.
- **Section B** identifies career field progression information, duties and responsibilities, training strategies, and career field path.
- **Section C** associates each level with specialty qualifications (knowledge, education, and training).
- **Section D** indicates resource constraints.
- **Section E** identifies transition training guide requirements for SSgt through MSgt.

2.2. Part II includes the following:

- **Section A** identifies the Specialty Training Standard (STS) to include duties, tasks, and technical references to support Air Education and Training Command (AETC) conducted training, wartime course, and correspondence course requirements.
- **Section B** contains the course objective list and training standards supervisors will use to determine if airmen satisfy training requirements.
- **Section C** identifies available support materials. Qualification Training Packages (QTPs) and CerTests support both upgrade training (UGT) and qualification training. QTPs are indexed in AF Index (AFIND) 8, Numerical Index of Specialized Educational Training Publications.
- **Section D** identifies a training course index supervisors can use to determine resources available to support training. Included here are both mandatory and optional courses, and exportable courseware.
- **Section E** identifies MAJCOM-unique training requirements supervisors can use to determine additional training required for the associated qualification needs.

- **Section F** identifies home station training references and courses for this specialty in support of contingency/wartime training.

3. Using guidance provided in the CFETP will ensure individuals in this specialty receive effective and efficient training at the appropriate point in their careers. This plan will enable us to train today's work force for tomorrow's jobs. At unit level, supervisors and trainers will use Part II to identify, plan, and conduct training commensurate with the overall goals of this guide.

ABBREVIATIONS/TERMS EXPLAINED

Advanced Training (AT). A formal course which provides individuals who are qualified in one or more positions of their Air Force Specialty (AFS) with additional skills/knowledge to enhance their expertise in the career field. Training is for selected career airmen at the advanced level of the AFS.

Air Force Career Field Manager (AFCFM). An individual on the Air Staff charged with the responsibility for overseeing all training and career field management aspects of an Air Force specialty or group of specialties.

Air Force Job Qualification Standard/Command Job Qualification Standard (AFJQS/CJQS). A comprehensive task list which describes a particular job type or duty position. They are used by supervisors to document task qualifications. The tasks on AFJQS/CJQS are common to all persons serving in the described duty position.

Career Field Education and Training Plan (CFETP). A CFETP is a comprehensive, multipurpose document encapsulating the entire spectrum of education and training for a career field. It outlines a logical growth plan that includes training resources and is designed to make career field training identifiable, to eliminate duplication, and to ensure this training is budget defensible.

CerTest. A multi-media training program used to train and test an individual's knowledge of the career field's principles and procedures.

Computer Based Training (CBT). The use of computers to aid in the delivery and management of instructional material.

Continuation Training. Additional training exceeding requirements with emphasis on present and future duty assignments.

Core Task. A task Air Force Career Field Managers (AFCFMs) identified as a minimum qualification requirement within an Air Force specialty or duty position. These tasks exemplify the essence of the career field.

Course Objective List (COL). A publication, derived from initial/advanced skills course training standard, identifying the tasks and knowledge requirements, and respective standards provided to achieve a 3-, 5-, and 7-skill level in this career field. Supervisors use the COL to assist in conducting graduate evaluations in accordance with AFI 36-2201, Developing, Managing, and Conducting Training.

Critical Task. Tasks assigned to an individual by the individual's MAJCOM. Such tasks become mandatory for UGT.

Distance Learning (DL). Training that is exported, such as from a resident course to a field location.

Duty Position Task. The tasks assigned to an individual for the position currently held. These include as a minimum all core tasks, critical tasks, and any other tasks assigned by the supervisor.

Enlisted Specialty Training (EST). A mix of formal training (technical school) and informal training (on-the-job) to qualify and upgrade airmen in each skill level of a specialty.

Exportable Training. Additional training via computer-assisted, paper text, interactive video, or other necessary means to supplement training.

Field Technical Training (Type 4). Special or regular on-site training conducted by a field training detachment (FTD) or by a mobile training team (MTT).

Initial Skills Training. A formal resident course which results in award of the entry level.

Instructional System Development (ISD). A deliberate and orderly, but flexible, process for planning, developing, implementing, and managing instructional systems. It ensures personnel are taught in a cost-efficient way the knowledge, skills, and attitudes essential for successful job performance.

Occupational Survey Report (OSR). A detailed report showing the results of an occupational survey of tasks performed within a particular AFS.

On-the-Job Training (OJT). Hands-on, over-the-shoulder training conducted to certify personnel in both upgrade (skill level award) and job qualification (duty position certification) training.

Optimal Training. The ideal combination of training settings resulting in the highest levels of proficiency on specified performance requirements within the minimum time possible.

Proficiency training is additional training, either in-residence, exportable advanced training courses, or on-the-job training, provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade.

Qualification Training (QT). Actual hands-on task performance training designed to qualify an individual in a specific duty position. This portion of the dual channel on-the-job training program occurs both during and after the upgrade training process. It is designed to provide the performance skills required to do the job.

Qualification Training Package (QTP). An instructional package designed for use at the unit to qualify, or aid qualification, in a duty position or program, or on a piece of equipment. QTPs identify the Air Force's standardized method for performing the task. The QTP may be printed (paper-based), computer-based, or in other audiovisual media.

Representative Sites. Typical organizational units having similar missions, weapon systems or equipment, or a set of jobs, used as a basis for estimating average training capacities and costs within the Training Impact Decision System (TIDES).

Resource Constraints. Resource deficiencies, such as money, facilities, time, manpower, or equipment that precludes desired training from being delivered.

Skills Training. A formal course resulting in the award of a skill level.

Specialty Training. A mix of formal training (technical school) and informal training (on-the-job) to qualify and upgrade airmen in the award of a skill level.

Specialty Training Standard (STS). Describes skills and knowledge that airmen in a particular AFS need on the job. It further serves as a contract between the Air Education and Training Command (AETC) and the user to show the overall training requirements for an AFS taught in the resident and nonresident courses.

Standard. An exact value, a physical entity, or an abstract concept, established and defined by authority, custom, or common consent to serve as a reference, model, or rule in measuring quantities or qualities, establishing practices or procedures, or evaluating results. A fixed quantity or quality.

Total Force. All collective Air Force components (active duty, Reserve, Guard, and civilian elements) of the United States Air Force.

Training Capacity. The capability of a training setting to provide training on specified requirements, based on the availability of resources.

Training Impact Decision System (TIDES). A computer-based decision support technology designed to assist Air Force career field managers (AFCFMs) in making critical judgments relevant to what training should be provided to personnel within career fields, when training should be provided (at what career points), and where training should be conducted (training setting). A TIDES template is used Air Force-wide for standardization and formatting of CFETPs.

Training Planning Team (TPT). Comprised of the same personnel as a U&TW, however TPTs are more intimately involved in training development and the range of issues is greater than is normal in the U&TW forum.

Training Requirements Analysis. A detailed analysis of tasks for a particular AFS to be included in the training decision process.

Upgrade training identifies the mandatory courses, task qualification requirements, and correspondence course completion requirements for award of the 5-, 7-, and 9-skill levels.

Utilization and Training Workshop (U&TW). A forum of the AFCFM, MAJCOM Functional Managers (MFMs), Subject Matter Experts (SMEs), and AETC training personnel that determine career ladder training requirements.

PART I

SECTION A - GENERAL INFORMATION

1. Purpose. This CFETP provides information necessary for Air Force Career Field Managers (AFCFMs), MAJCOM functional managers (MFM), commanders, training managers, supervisors, and trainers to plan, develop, manage, and conduct an effective career field training program. This plan outlines the training individuals require to develop and progress throughout their careers. It identifies initial skills, upgrade, qualification, advanced, and proficiency training.

- **Initial skills training** is the AFS-specific training an individual receives upon entry into the Air Force or upon retraining into this specialty for award of the 3-skill level. Normally, this training is conducted by AETC at one of the technical training wings.
- **Upgrade training** identifies the mandatory courses, task qualification requirements, and correspondence course completion requirements for award of the 5-, 7-, and 9-skill levels.
- **Qualification training** is actual hands-on task performance training designed to qualify an airman in a specific duty position. This training program occurs both during and after the upgrade training process. It is designed to provide the performance skills/knowledge required to do the job.
- **Advanced Training.** A formal course which provides individuals who are qualified in one or more positions of their Air Force Specialty (AFS) with additional skills/knowledge to enhance their expertise in the career field. Training is for selected career airmen at the advanced level of the AFS.
- **Proficiency training** is additional training, either in-residence, exportable advanced training courses, or on-the-job training, provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade.

The CFETP has several purposes:

1.1. Serves as a management tool to plan, manage, conduct, and evaluate a career field training program. It is used to help supervisors identify training at the appropriate point in an individual's career.

1.2. Identifies task and knowledge training requirements for each skill level in the specialty and recommends education/training throughout each phase of an individual's career.

1.3. Lists training courses available in the specialty and identifies sources of training and training delivery methods.

1.4. Identifies major resource constraints which impact full implementation of the desired career field training process.

2. Uses. The plan will be used by MFMs and supervisors at all levels to ensure comprehensive and cohesive training programs are available for each individual in the specialty.

2.1. AETC training personnel will develop/revise formal resident, nonresident, field, and exportable training based on requirements established by the users and documented in Part II of the CFETP. They will also work with the AFCFM, Air Force Civil Engineer Support Agency Training Division (HQ AFCEA/CEOT) to develop acquisition strategies for obtaining resources needed to provide the identified training.

2.2. MFMs will ensure their training programs complement CFETP mandatory initial, upgrade, and proficiency requirements and identify requirements that can be satisfied by OJT, resident training, contract training, CerTest, or exportable courses. MAJCOM-developed training to support this AFS must be identified for inclusion into the plan.

2.3. Unit Training managers and supervisors must ensure each individual completes the mandatory training requirements (including MAJCOM supplemental requirements) for the upgrade training specified in this plan.

2.4. Each individual will complete the mandatory training requirements specified in this plan. The lists of courses in Part II will be used as a reference to support training.

3. Coordination and Approval. The AFCFM is the approval authority for the CFETP. MAJCOM representatives and AETC personnel will identify and coordinate on the career field training requirements. The AETC training manager for this specialty will initiate an annual review of this document by AETC and MFMs to ensure currency and accuracy. Using the list of courses in Part II, they will eliminate duplicate training.

SECTION B - CAREER FIELD PROGRESSION AND INFORMATION

4. Specialty Descriptions. Readiness Apprentice, Journeyman, Craftsman, and Superintendent.

4.1. Specialty Summary. Prepares, maintains, and monitors Civil Engineer (CE) operations plans and supporting documents for mobility, response, and recovery operations. Reviews and provides input to installation contingency plans. Monitors Prime Base Engineer Emergency Force (BEEF), air base operability, and disaster preparedness programs, and conducts/schedules associated training. Manages assigned equipment and supplies, performs or schedules equipment maintenance, and inventories assets. Maintains and inspects nuclear, biological, chemical, and conventional (NBCC) protective clothing and equipment. Conducts NBCC warning and reporting activities. Related DoD Occupational Subgroup: 494.

4.2. Duties and Responsibilities for Apprentice, Journeyman, and Craftsman.

4.2.1. Prepares wartime and contingency response plans.

- Conducts research and assists in development of disaster preparedness plans, including measures to minimize casualties and damage from natural disasters, major accidents, wartime operations, and military operations other than war.
- Coordinates actions to ensure prompt response during disaster operations, including immediate mobilization of all resources and participation of all agencies and organizations.
- Coordinates actions to allow continuation or restoration of vital functions and operations.
- Prepares disaster preparedness annexes, appendices, supplements, and other supporting documents in support of operational plans.
- Prepares checklists and operating instructions for readiness activities.

4.2.2. Develops and maintains plans for contingency, mobility, and recovery.

- Extracts tasking from the time-phased force deployment list.
- Establishes, coordinates, conducts, and monitors Prime BEEF program operation.
- Assigns Prime BEEF personnel.
- Analyzes training and deficiencies for wartime tasks.
- Identifies, budgets, requisitions, and accounts for equipment and supplies used by readiness and contingency teams.

- Inputs, maintains, reviews data, and prepares Status of Resources and Training System (SORTS) reports.
- Establishes, coordinates, and maintains the annual Prime BEEF training plan.
- Identifies and prepares personnel for individual CE AFS contingency deployments.

4.2.3. Manages, schedules, and conducts training on readiness activities and survival measures for disasters and contingencies.

- Provides briefings and develops installation disaster preparedness training and educational materials.

4.2.4. Assists in emergency planning and response to comply with Executive Order 12856 and the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986.

4.2.5. Monitors CE readiness and installation disaster preparedness program activities.

- Inspects equipment.
- Ensures disaster preparedness teams are established and manned.
- Acts as exercise evaluation team member for CE Readiness Flight and ensures exercises are conducted according to directives.
- Ensures authorized and required NBC protective equipment and clothing, detection devices, and monitoring instruments are available, calibrated, and in operating condition.
- Monitors actions to preserve life, minimize damage, and restore operations following natural disasters, accidents, and wartime attacks.
- Coordinates disaster preparedness activities and plans with all base units and nearby military and civilian organizations.
- Briefs military and civilian personnel in conjunction with community relations programs.
- Monitors air base operability activities.
- Requisitions supplies and equipment for the CE Readiness Flight and disaster preparedness support team (DPST).
- Maintains custodial files for accounts, such as supply and equipment, intrabase radio, and test, measurement, and diagnostic equipment (TMDE).

4.2.6. Manages unit and staff agency program.

- Conducts unit and staff agency assistance as needed to ensure disaster preparedness planning and training have been accomplished, and disaster preparedness directives are being followed.
- Conducts disaster preparedness analysis.

4.2.7. Monitors contamination control.

- Measures contamination.
- Assists bioenvironmental engineers in interpretation of hazards to personnel.
- Establishes requirements for contamination control.
- Coordinates and implements exposure control procedures.
- Plots contamination levels and coordinates with medical personnel to identify contaminated areas and establish safety procedures.
- Documents findings and reports to proper authority.
- Ensures requirements and procedures are established for contamination control activities.

4.2.8. Performs CE readiness and installation disaster preparedness functions.

- Serves in mobile or unit command post, survival recovery center, or NBC control center.
- Monitors force survivability and advises the Readiness Flight officer or NCO of deployment and employment capabilities.
- Establishes an integrated conventional and NBC detection network..
- Helps prepare for conventional and NBC defense, including activating NBC teams for shelter, decontamination. monitoring, plotting, and reporting.
- Coordinates protective shelter stocking.
- Supervises teams engaged in monitoring and contamination control operations.
- Reviews findings of personnel operating detection equipment, and compiles data to indicate danger areas.

- Ensures specialized teams comply with contamination control and safety procedures.
- Manages activities in the Nuclear, Biological, Chemical Control Center (NBCCC).
- Operates mobile command post and disaster preparedness communications net.
- Helps analyze reports and plotting areas of contamination.
- Advises commanders on mission impact and recovery activities following an attack.
- Determines contamination levels and amount over a given area and, in conjunction with medical personnel, recommends time limits that personnel may remain in the area.
- Ensures emergency processing procedures are established for personnel decontamination at the contamination control line.
- Ensures clothing can be exchanged and subsequent decontamination or disposal of clothing and other material is accomplished.
- Advises CE Readiness Flight officer on overall situation during disasters or contingency operations.
- Maintains directives.
- Maintains operations event log.
- Prepares reports.
- Utilizes data automation processing equipment and software including word processing, graphics, mapping, and database management programs.

4.2.9. Ensures safety procedures are followed.

- Ensures exposure and contamination control procedures are established, coordinated, and distributed.
- Ensures safety precautions are taken by assigned personnel.

4.3. Duties and Responsibilities for Superintendents. Advises on problems associated with the career field.

5. Skill/Career Progression. Adequate training and timely progression from the apprentice to the superintendent skill level plays an important role in the Air Force's ability to accomplish its mission. It is essential that everyone involved in training does their part to plan, manage, and conduct an effective training program. The guidance provided in this part of the CFETP will ensure individuals receive viable training at appropriate points in their careers.

5.1. Apprentice. (3-Level)

- Upon completion of initial skills training, a trainee will work with a trainer to enhance their knowledge and skills.
- Utilize the Career Development Course (CDC), Qualification Training Packages (QTPs) and other exportable courses to progress in the career field.
- Once task certified, a trainee may perform the task unsupervised.

5.2. Journeyman. (5-Level)

- Enter into continuation training to broaden experience base.
- 5-Levels may be assigned job positions such as team leader and shift supervisor.
- Will attend the Airman Leadership School (ALS) after serving 48 months in the Air Force (active duty only). In-residence or correspondence course required for Air Reserve Component (ARC) personnel.
- Will use CDCs to prepare for Weighted Airman Performance Systems (WAPS) testing.
- Should continue pursuing a Community College of the Air Force (CCAF) degree.

5.3. Craftsman. (7-Level)

- A craftsman can expect to fill various supervisory and management positions such as shift leader, mobility team chief, production supervisor, or task certifier.
- Seven-levels should take courses or obtain added knowledge on management of resources and personnel, and attend the 7-level resident course.
- Continue academic education through CCAF and higher degree programs is encouraged.
- Will attend the Noncommissioned Officer Academy (NCOA) after promotion to TSgt (active duty only). In-residence or correspondence course required for ARC personnel.

5.4. Superintendent. (9-Level)

- A 9-level can be expected to fill positions such as flight chief and various staff positions.
- Should pursue increased knowledge of budget, manpower, resources, and personnel management.
- Recommend the pursuit of additional higher education and completion of courses outside of their career AFS.

5.5. Civil Engineer Readiness Manager.

- Must be selected for CMSgt and possess qualifications in the 3E9X1 specialty.
- Will work in a variety of similar jobs and functional areas where general managerial and supervisory abilities can be most effectively used and challenged.
- Resident graduation of the USAF Senior NCO Academy (SNCOA) is a prerequisite for CMSgt sew-on (active duty only). In-residence or correspondence course required for ARC personnel.

6. Training Decisions. The CFETP uses a building block approach (simple to complex) to encompass the entire spectrum of training requirements for the Readiness career field. The spectrum includes a strategy for when, where, and how to meet the training requirements. The strategy must be apparent and affordable to reduce duplication of training and eliminate a disjointed approach to training. The following decisions were made at the career field Utilization & Training Workshop (U&TW) held at Ft McClellan AL in October 1996.

6.1. Initial Skills Training. The initial skills course was reviewed for content. Additions, deletions, and modifications were made to the course using Mission Ready Technician (MRT) as the guiding criteria. Wartime training tasks were identified. Additional contingency training was also identified.

6.2. Five Level Upgrade Training Requirements. Existing CDCs were reviewed and scrubbed to ensure only current material remained and new technology information was added.

6.3. Seven Level Upgrade Training Requirements. 7-level training requirements were reviewed.

6.4. Proficiency Training.

- Any additional knowledge and skill requirements which were not taught through initial skills or upgrade training are assigned as continuation training.
- Purpose of continuation training is to provide training exceeding minimum upgrade training requirements with emphasis on present and future duty positions.

- MAJCOMs must develop a continuation training program that ensures individuals in the career field receive the necessary training at the appropriate point in their careers.
- The training program will identify both mandatory and optional training requirements.

6.4.1. Supplemental Training. SMEs and the Education and Training Review Committee (ETRC) reviewed supplemental training courses for technical accuracy and identified training that was no longer required. They revalidated the remaining courses as necessary to fully support the career progression in the AFS.

6.4.2. CerTest. Originally, the CerTest program was developed to support transition training. Now, it should be used as supplemental training to support OJT and QT.

7. Community College of the Air Force (CCAF) Academic Programs. Airmen are automatically enrolled in CCAF upon completion of basic military training. CCAF provides the opportunity to obtain an Associates in Applied Sciences Degree. In addition to its associates degree program, CCAF offers the following:

- **Occupational Instructor Certification.** Upon completion of instructor qualification training (consisting of the Instructor Methods course and supervised practice teaching), CCAF instructors possessing an associates degree or higher may be nominated by their school commander/commandant for certification as an occupational instructor.
- **Trade Skill Certification.** When a CCAF student separates or retires, a trade skill certification is awarded for the primary occupational specialty. The College uses a competency-based assessment process for trade skill certification at one of four proficiency levels: Apprentice, Journeyman, Craftsman/Supervisor, or Master Craftsman/Manager. All are transcribed on the CCAF transcript.

7.1. The Disaster Preparedness Associates Degree (9IMY) applies to AFSC 3E9X1.

7.2. Degree Requirements: The 5-skill level must be held at the time of program completion.

Course	Semester Hours
Technical Education.....	24
Leadership, Management, and Military Studies.....	6
Physical Education.....	4
General Education.....	15
Program Elective.....	15
Technical Education; Leadership, Management, and Military Studies; or General Education	

Total..... **64**

7.2.1. Technical Education (24 Semester Hours): A minimum of 12 semester hours of technical core subjects/courses must be applied and the remaining semester hours applied from technical Core/technical elective subjects/courses. Requests to substitute must be approved in advance by the Community College of the Air Force (CCAF), Services Branch, Maxwell AFB AL.

Technical Core Requirements	Semester Hours
CCAF Internship.....	16
Disaster Control.....	6
Disaster Preparedness Application.....	6
Disaster Recovery Operations.....	6
Emergency Management.....	6
Emergency Response Planning.....	6
Hazard Mitigation.....	6
Hazardous Materials.....	6
Instructional Methodology.....	6
Physical Security Engineering/Management.....	3
Radiological Monitoring/Response.....	6
Risk Assessment.....	6

Technical Electives	Semester Hours
Acquisition Management.....	3
AF Enlisted PME.....	12
Civil Defense.....	3
Climatology/Meteorology.....	3
Computer Science.....	6
Emergency Communications Systems.....	3
Emergency Medicine.....	6
Exercise Design.....	3
General Biology.....	4
General Chemistry.....	4
Introduction to Public Administration.....	3
Inventory Management.....	3
Safety Management.....	3
Search-and-Rescue Techniques.....	3
Technical Writing.....	3
Tests and Measurements.....	3

7.2.2. Leadership, Management, and Military Studies (6 Semester Hours): Professional military education and/or civilian management courses.

7.2.3. Physical Education (4 Semester Hours): This requirement is satisfied by completion of Basic Military Training.

7.2.4. General Education (15 Semester Hours): Applicable courses must meet the criteria for application of courses to the General Education Requirements (GER) and be in agreement with the definitions of applicable general education subjects/courses as provided in the CCAF General Catalog.

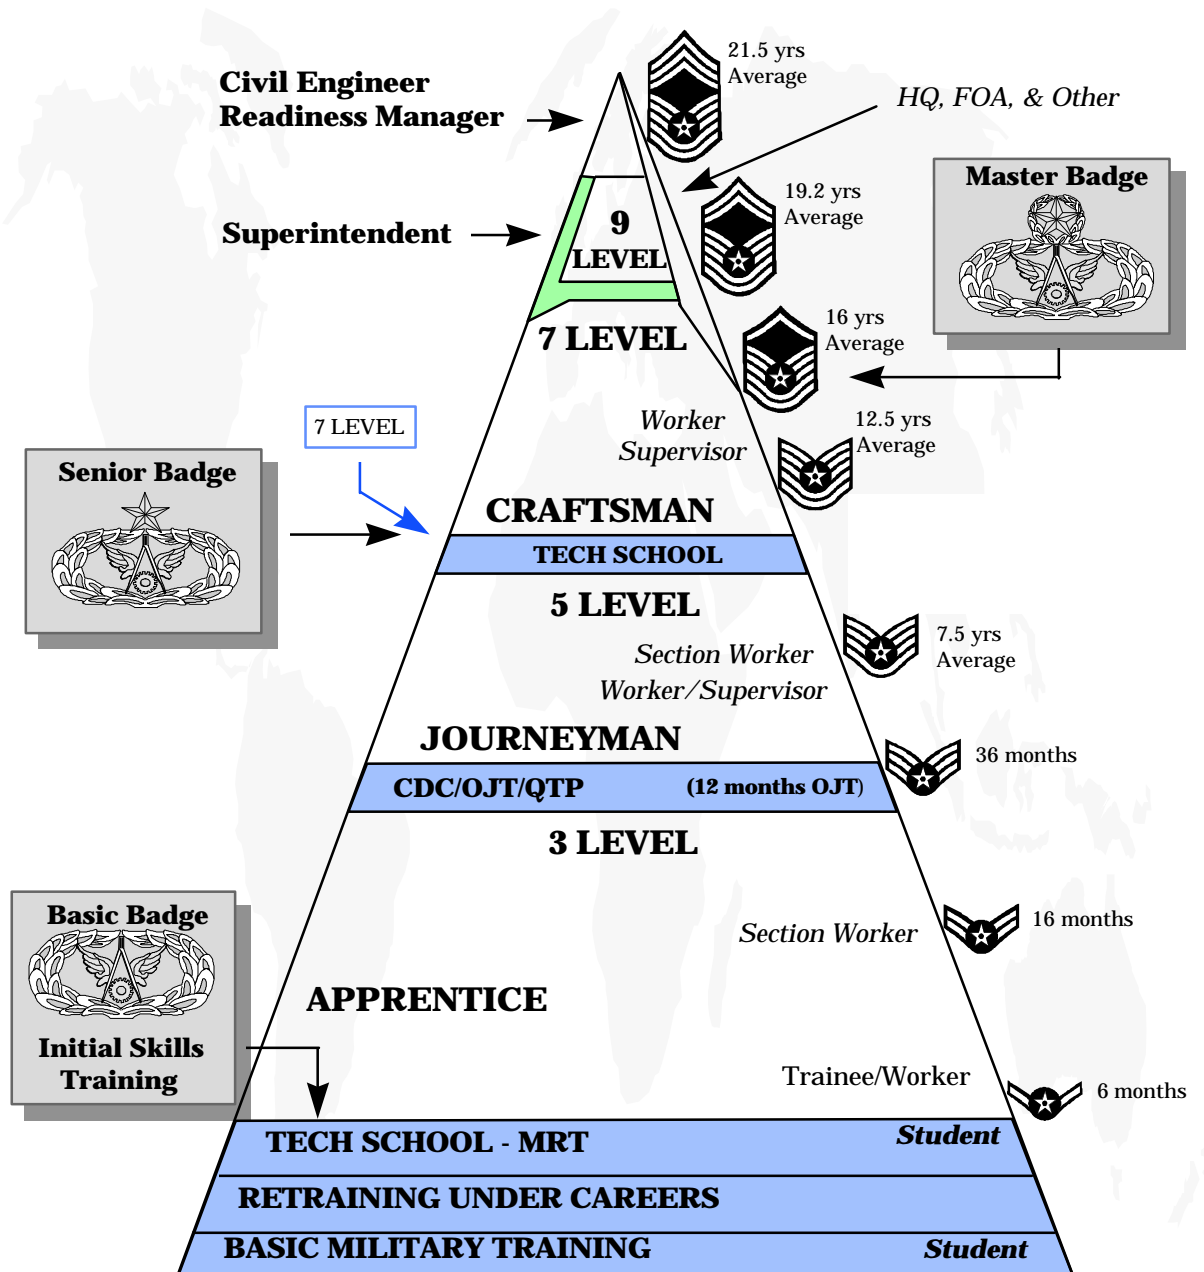

General Education	Semester Hours
Oral Communication.....	3
Speech	
Written Communication.....	3
English Composition	
Mathematics.....	3
An intermediate algebra or a college-level mathematics course is required. If an approved mathematics course is used as a Technical or Program Elective, a natural science course that meets general education requirements (GER) criteria may be applied towards the General Education Requirement.	
Social Science.....	3
Anthropology, Archaeology, Economics, Geography, Government, History, Political Science, Psychology, Sociology	
Humanities.....	3
Fine Arts (History, Criticism, and Appreciation)	
Foreign Language, Literature, Philosophy, Religion	

7.2.5. Program Elective (15 Semester Hours): Satisfied with applicable technical education; leadership, management, and military studies; or general education subjects/courses, including natural science courses meeting GER application criteria and foreign language credit earned at the Defense Language Institute or through the Defense Language Proficiency Test. Six semester hours of CCAF-degree applicable technical credit otherwise not applicable to this program may be applied. See the CCAF General Catalog for details regarding the Associates of Applied Science for this specialty.

7.3. Additional off-duty education is a personal choice that is encouraged for all. Individuals desiring to become an Air Education and Training Command (AETC) Instructor should actively pursue an Associates Degree. A degreed faculty is necessary to maintain accreditation through the Southern Association of Colleges and Schools.

8. **Career Field Path.** The following chart depicts this specialty's career path.

Readiness Enlisted Career Pyramid

8.1. The Readiness Manpower table represents the 1997 demographics for the specialty by grade.

Table 8.1 - Manpower Table									
	CMSgt	SMSgt	MSgt	TSgt	SSgt	SrA	A1C	Amn	AB
Base Level	1	16	95	141	189	179	0	0	0
MAJCOM Staff	6	12	6	1	0	0	0	0	0
HQ USAF Staff	0	0	0	0	0	0	0	0	0
FOA/DRU	1	1	2	2	0	0	0	0	0
Total	8	29	103	144	189	179	0	0	0

Note: CMSgt allocations represent numbers applicable to Civil Engineer AFSCs 3E9X1.

8.2. CE Occupational Badge. The Civil Engineer badge reflects a great history and tradition. By wearing it, you will be recognized by your fellow airmen as having achieved an expected level of competence. The multitude of engineers before you established this expectation through excellent service in both peace and war. Eligibility criteria for award and wear of AF occupational badges can be found in AFI 36-2923 (Aeronautical, Duty, and Occupational Badges), on the AFEPL, Air Force Electronic Publications Library.

8.2.1. CE Badge Heraldry. The gear wheel and compass have historically been used to represent the engineering profession, in both the military and civilian sector. The gear represents the essence of engineering: applying scientific principles and technology to practical ends. To Air Force engineers, the gear symbolizes an element (representing the built environment) that meshes with other environments (weapon systems and trained personnel) to enable the Air Force to perform its mission. The compass is a precision tool historically used by engineers in designing and constructing facilities and equipment. The gear and compass together symbolize all the diverse specialties within Air Force civil engineer. Finally, the wings help to portray the fundamental linkage between the engineering and aviation components; and that the built environment is the foundation supporting Air Force mission and people.

8.2.2. Basic Badge. The basic badge is awarded upon successful completion of the apprentice course.

8.2.3. Senior Badge. The senior badge adds a star to the top of the badge. This is awarded after the member successfully completes the 7-level awarding course.

8.2.4. Master Badge. The master badge adds a wreath around the star. It's awarded to master sergeant or above with 5 years in the specialty from award of the 7-skill level.

8.3. Enlisted Career Path.

Table 8.2 Enlisted Career Path				
Education and Training Requirements	GRADE REQUIREMENTS			
	Rank	Average Sew-On	Earliest Sew-On	High Year Of Tenure (HYT)
Basic Military Training school				
Apprentice Technical School (3-Skill Level)	Amn A1C	6 months 16 months		
Upgrade To Journeyman (5-Skill Level) - Complete 3 months duty position/apprentice experience before beginning journeyman training. - Minimum 12 months on-the-job training. - Complete appropriate CDC if/when available. - Sew-on SrA for award of the 5-skill level.	SrA	3 years	28 months	10 Years
Airman Leadership School (ALS) - Must be a SrA with 48 months time in service or be a SSgt Selectee. - Resident graduation is a prerequisite for SSgt sew-on (Active Duty Only).	<u>Trainer</u> - Trainer must be qualified and certified on tasks to be trained. - Must attend formal AF Training Course and be appointed by Commander.			
Upgrade To Craftsman (7-Skill Level) - Minimum rank of SSgt. - 18 months OJT. - Complete appropriate CDC if/when available. - Advanced Technical School.	SSgt	7.5 years	3 years	20 Years
Retrainee: - Minimum of 3 months apprenticeship - Minimum 6 months for 5-level - Minimum 12 months for 7-level UGT	<u>Certifier</u> - SSgt with 5-skill level or civilian equivalent. - Attend formal AF Certifier Course and appointed by Commander. - Be a person other than the trainer (for core and critical tasks only).			
Noncommissioned Officer Academy (NCOA) - Must be a TSgt or TSgt Selectee. - Resident graduation is a prerequisite for MSgt sew-on (Active Duty Only).	TSgt	12.5 years	5 years	20 Years
	MSgt	16 years	8 years	24 Years
USAF Senior NCO Academy (SNCOA) - Must be a SMSgt or SMSgt Selectee. - Resident graduation is a prerequisite for CMSgt sew-on (Active Duty Only).	SMSgt	19.2 years	11 years	26 Years
Upgrade To Superintendent (9-Skill Level) - Minimum rank of SMSgt. - Must be a resident graduate of SNCOA (Active Duty Only).	CMSgt	21.5 years	14 years	30 Years

SECTION C - SKILL LEVEL TRAINING REQUIREMENTS

9. Purpose. The various skill levels in the career field are defined in terms of tasks and knowledge requirements for the Readiness career ladder. They are stated in broad, general terms and establish the standards of performance. An all encompassing core task list has been developed for this specialty because of the diversity of the missions supported and the equipment installed to meet mission requirements. Core tasks, knowledge items, and skill requirements for this specialty are identified in the STS. Completion of the mandatory 3-level skill awarding course, the mandatory use and completion of CDCs, the mandatory 7-level course, and the mandatory use and completion of applicable AFJQS/AFQTPs comprise the Air Force core tasks for this specialty.

10. Skill Level Training Requirements.

10.1. Apprentice (3-Level) Training Requirements. (3E931)

10.1.1. Specialty Qualifications.

10.1.1.1. Knowledge. Must have a working knowledge in training, and logistics regarding the AF NBC defense program, air base operability, major accident response, natural disasters, and other contingencies. This includes, but is not limited to NBC warning and reporting, force beddown, phases of response, deployment operations, and organizations for response. Knowledge of the following is also mandatory:

- Characteristics and effects of conventional and NBC weapons.
- Detection of NBC contamination.
- Passive defense measures.
- Principles of contamination control.
- Technical information, policies, procedures, and the latest disaster preparedness techniques and equipment.
- CE readiness and contingency/deployment training, operations, and equipment supply procedures, directives, and policies.

10.1.1.2. Education. For entry into this specialty, completion of high school with courses in algebra, chemistry, data processing, and speech is desirable.

10.1.1.3. Training. Completion of the Readiness Apprentice course J3ALP3E931 000, Readiness Apprentice Course Ft McClellan AL is mandatory.

10.1.1.4. Experience.

- Prior qualification in any 5-skill level AFSC (3-skill level if no 5-skill level exists).
- Previous experience in NBC operations is desirable.

10.1.1.5. Other. Attachment 41, AFMAN 36-2108 (Utilization and Classification of Air Force Military Personnel), establishes minimum requirements for aptitude, physical profile series factors (PULHES code 222221), and other AFS requirements or restrictions. Also, the following are required for entry into this specialty.

- Normal color vision as defined in AFMAN 48-123, Medical Examination and Standards.
- For entry, award, and retention of this AFSC, no record of claustrophobia or claustrophobic tendencies.
- Qualification to operate government vehicles according to AFMAN 24-309, Vehicle Operations.
- For entry, award, and retention of this AFSC, ability to speak distinctly.
- For award and retention of AFSC 3E931, possession of a Secret security clearance according to AFI 31-501 (formerly AFR 205-32).

10.1.2. Training Sources/Resources.

- Formal training is accomplished through course J3ALP3E931 000, Readiness Apprentice Course, Ft McClellan AL
- The COL (Part II, Section B of this CFETP) identifies all the knowledge and tasks, with their respective standards.
- When available, QTPs are mandatory for use during UGT/QT on all core tasks, critical tasks, and contingency/war (◆) tasks.

10.1.3. Implementation. The 3-skill level is awarded upon graduating the Readiness Apprentice Course, J3ALP3E931 000, at Ft McClellan AL

10.2. Journeyman (5-Level) Training Requirements. (3E951)

10.2.1. Specialty Qualification. Entry into 5-level upgrade training is initiated after the individual has completed the 3-level school and performed as an apprentice for a minimum of 3 months or a maximum of 6 months. All 3E931 qualifications apply to 3E951 requirements.

10.2.1.1 Knowledge. Must have a working knowledge in training, planning, operations, and logistics regarding the AF NBC defense program, air base operability, major accident response, natural disasters, and other contingencies. This includes, but is not limited to NBC warning and reporting, threat assessment, hazard risk analysis, force beddown, phases of response, deployment operations, and organizations for response. Knowledge of the following is also mandatory:

- Characteristics and effects of conventional and NBC weapons.
- Detection of NBC contamination.
- Passive defense measures.
- Principles of contamination control.
- Technical information, policies, procedures, and the latest disaster preparedness techniques and equipment.
- CE readiness and contingency/deployment planning, training, operations, and equipment supply procedures, directives, and policies.

10.2.1.2. Education. All 3E931 education apply to 3E951 requirements.

10.2.1.3. Training.

- Completion of CDCs 3E951, Readiness Journeyman, is mandatory.
- Completion of CDC 3E050, General Contingency Responsibilities, is mandatory for all Civil Engineer personnel after completion of their specialty CDC.
- All core tasks identified with a single asterisk (*) in the core task column of the STS.
- QTPs for assigned core tasks, critical tasks, and contingency war (◆) tasks.
- Duty position requirements identified by the supervisor.
- HAZMAT First Responder Awareness training is mandatory.
- Should attend Nuclear Emergency Team Operations (NETOPs), J502D13ED-000, HAZMAT (First Responder Technician and Incident Commander) Levels III and V and NBC Cell Operations, 3AZP3E971-005.

10.2.1.4. Experience.

- Qualification in and possession of AFSC 3E931.
- Experience performing functions such as helping prepare disaster preparedness plans.

10.2.1.5. Other. Same as 3E931.

10.2.2. Training Sources/Resources.

- CDC 3E951, Readiness Journeyman.
- CDC 3E050, General Contingency Responsibilities.
- The STS (Part II, Section A of the CFETP) identifies all core tasks required for qualification in the individual's duty position.
- Qualified trainers provide upgrade and qualification training for duty positions, managed programs, and/or equipment to be used.

10.2.3. Implementation.

- Entry into formal Journeyman upgrade training is accomplished 6 months after individuals are assigned to their first duty station (a minimum of 3 months with supervisor approval). During this initial 3-6 months, apprentices build task experience while reinforcing training learned at the technical school.
- CDCs for this specialty may be ordered (with supervisor's concurrence) one month prior to completion of the 3-6 month period.
- Qualification training is initiated any time individuals are assigned duties they are not qualified to perform.
- QTPs are used concurrently to obtain necessary duty position qualifications.

10.3. Craftsman (7-Level) Training Requirements. (3E971)

10.3.1. Specialty Qualification. All 3E951 qualifications apply to 3E971 requirements.

10.3.1.1. Knowledge. Must have a working knowledge in training, planning, operations, and logistics regarding the AF NBC defense program, air base operability, major accident response, natural disasters, and other contingencies. This includes, but is not limited to NBC warning and

reporting, threat assessment, hazard risk analysis, force beddown, phases of response, deployment operations, and organizations for response. Knowledge of the following is also mandatory:

- Characteristics and effects of conventional and NBC weapons.
- Detection of NBC contamination.
- Passive defense measures.
- Principles of contamination control.
- Technical information, policies, procedures, and the latest disaster preparedness techniques and equipment.
- CE readiness and contingency/deployment planning, training, operations, and equipment supply procedures, directives, and policies.

10.3.1.2. Education.

- To assume the grade of SSgt, individuals must successfully complete Airman Leadership School (active duty only).
- To assume the grade of MSgt, individuals must successfully complete the NCO Academy (active duty only).
- For ANG/AFRES, completion of ECI courses 00001 (ALS) and 00006 D&E (NCO Academy) satisfy the requirements.

10.3.1.3. Training.

- Completion of in-residence CE 7-Level Readiness Craftsman J3ACP3E971 000 is mandatory.
- Certification training at the Silver Flag Exercise Sites is not required for upgrade training, but may be required based on wartime commitments.
- All 3E9X1 personnel should attend refresher training course, J3AZP3E971 003 every 3 to 5 years.
- Recommend training through applicable Federal Emergency Management Agency (FEMA) independent study courses; AFIT Civil Engineer and Services School; Readiness Management course (MGT 410); NBC Cell Operations, J3AZP3E971 005; and Air Base Operability courses.
- All core tasks identified with a double asterisk (**) in the core column of the STS.

- QTPs for assigned core tasks, critical tasks, and contingency war (♦) tasks.
- Duty position requirements identified by the supervisor.

10.3.1.4. Experience.

- Qualification in and possession of AFSC 3E951.
- Experience performing or supervising functions such as preparing plans and conducting readiness activities.

10.3.1.5. Other. Same as 3E931.

10.3.2. Training Sources/Resources.

- Course J3ACP3E971 000, In-residence CE 7-Level Readiness Craftsman.
- NCO Academy Course 00006 D&E (paper base correspondence).
- The STS (Part II, Section A of this CFETP) identifies all core tasks required for qualification in the individual's duty position.
- Qualified trainers provide upgrade and qualification training for duty positions, managed programs, and/or equipment to be used.

10.3.3. Implementation.

- Entry into 7-level training is initiated when an individual is selected for SSgt and is fully qualified in AFSC 3E951.
- Qualification training is initiated any time an individual is assigned duties that they are not qualified to perform.
- QTPs are used concurrently to obtain necessary duty position qualifications.

10.4. Superintendent (9-Level) Training Requirements. (3E991)

10.4.1. Specialty Qualification.

10.4.1.1. Knowledge. Must have a working knowledge in training, planning, operations, and logistics regarding the AF NBC defense program, air base operability, major accident response, natural disasters, and other contingencies. This includes, but is not limited to NBC warning and reporting, threat assessment, hazard risk analysis, force beddown, phases of response, deployment operations, and organizations for response. Knowledge of the following is also mandatory:

10.4.1.2. Education.

- Completion of in-residence Senior NCO Academy is mandatory (active duty only).
- For ANG/AFRES, completion of ECI course 00008 D&E (paper base correspondence) **or** course 00005 (computer based CD ROM) satisfy the Senior NCO Academy requirement.

10.4.1.3. Training. Completion of duty position training requirements.

10.4.1.4. Experience.

- Qualification in and possession of AFSC 3E971 is mandatory.
- Also, experience directing functions such as readiness programs, or evaluating, planning, and organizing readiness activities.

10.4.1.5. Other. Same as 3E931.

10.4.2. Training Sources/Resources.

- In-residence SNCO Academy located at Maxwell AFB - Gunter Annex AL.
- SNCO Academy Course 00008 D&E (paper base correspondence).
- SNCO Academy Course 00005 (exportable computer based CD ROM).

10.4.3. Implementation.

- Entry into 9-level training is initiated when an individual is selected for SMSgt and is fully qualified in AFS 3E971.
- QT is initiated any time an individual is assigned duties they are not qualified to perform.

10.5. Civil Engineer Readiness Manager.

10.5.1. Specialty Qualification.

10.5.1.1. Knowledge. Must have an in depth knowledge in all aspects of training, planning, operations, and logistics regarding the AF NBC defense program, air base operability, major accident response, natural disasters, and other contingencies. This includes, but is not limited to NBC warning and reporting, threat assessment, hazard risk analysis, force beddown, phases of response, deployment operations, and organizations for response. Knowledge of the following is also mandatory:

- Characteristics and effects of conventional and NBC weapons.
- Detection of NBC contamination.
- Passive defense measures.
- Principles of contamination control.
- Technical information, policies, procedures, and the latest disaster preparedness techniques and equipment.
- CE readiness and contingency/deployment planning, training, operations, and equipment supply procedures, directives, and policies.

10.5.1.2. Education. Same as 3E991.

10.5.1.3. Training. Same as 3E991.

10.5.1.4. Experience.

- Qualification in and possession of AFSC 3E991.
- Experience directing functions such as readiness programs, or evaluating, planning, and organizing readiness activities.
- Managerial ability to plan, direct, coordinate, implement, and control a wide range of work activity.

10.5.1.5. Other. Same as 3E931.

10.5.1.2. Training Sources/Resources.

10.5.3. Implementation. Entry into Civil Engineer Readiness Manager code 3E900 is initiated when an individual is selected for CMSgt and possess qualifications in the 3E991 Specialty.

SECTION D - RESOURCE CONSTRAINTS

11. Purpose. This section identifies known resource constraints which preclude optimal/desired training from being developed or conducted. Narrative explanations of each resource constraint and an impact statement describing what effect each constraint has on training are included. Also included in this section are actions required, office of primary responsibility, and target completion dates. HQ AFCEA/CEOT and HQ AETC training experts will review and update resource constraints annually.

12. Apprentice (3-Level) Training. J3ALP3E931 003, Readiness Apprentice.

12.1. Constraint. Course implementation with slashes (column 4A1). Course cannot be implemented until completion and approval of Plan of Instruction (POI). **Note: Final removal of those constraints (identified with slashes in column 4A1) cannot occur until full implementation of the Mission Ready Technician (MRT) program.**

12.1.1. Impact. Required training will not be ready for implementation upon publication of this CFETP.

12.1.2. Resources Required. None, other than time for course development . Manpower resources are available to complete required course revisions by the specified target completion date. **Note: Full implementation of training requirements (removal of slashes in column 4A1) cannot be accomplished until MRT program initiatives have been fully funded (equipment, manpower, etc.).**

12.1.3. Action Required. Complete revision of the 3-level course to meet all training requirements and proficiency codes identified in this CFETP.

12.2. OPR/Target Completion Date. 366 TRS/TSIM will implement revised training with class beginning 18 Sep 97.

13. Journeyman (5-Level) Training. QTP development for all core tasks.

13.1. Constraints. Time for development of QTPs to meet added and changed requirements in this CFETP.

13.1.1. Impact. Required QTPs will not be ready for UGT or QT upon publication of this CFETP.

13.1.2. Resources Required. Manpower (SMEs) from MAJCOMs to complete the development of paper-based QTPs.

13.1.3. Action Required. Complete all QTPs to meet all the training requirements identified in this CFETP.

13.2. OPR/Target Completion Date. HQ AFCESA/CEOT will hold workshops to develop required QTPs. ECD: Oct 97

14. Craftsman (7-Level) Training. QTPs.

14.1. Constraints. Required lead time for development of QTPs to meet added and changed requirements in this CFETP.

14.1.1. Impact. Required QTPs will not be ready for UGT or QT upon publication of this CFETP.

14.1.2. Resources Required. Manpower (SMEs) from MAJCOMs to complete the development of paper-based QTPs.

14.1.3. Action Required. Complete all QTPs to meet all the training requirements identified in this CFETP.

14.2. OPR/Target Completion Date. HQ AFCESA/CEOT will hold workshops to develop required QTPs. ECD: Oct 97

15. Superintendent (9-Level) Training. No Constraints.

SECTION E - TRANSITIONAL TRAINING GUIDE

15. Purpose. This transition guide will lay the direction/control to prepare our personnel for the 21st century. Also, tomorrow's challenges will be measured by how well we plan today, and our strength and direction are assured only through proper training. Only your genuine commitment to meeting this challenge head-on will ensure the Air Force and our specialty benefit fully.

16. Conditions. Effective 1 November 1995, all Prime BEEF and Disaster Preparedness functions were placed under the responsibility of the CE **Readiness** Flight and duties and responsibilities will be carried out by the 3E9X1 career field. There was a period whereby personnel working Prime BEEF (3E6X1) duties were authorized to transition into the 3E9X1 Air Force specialty.

16.1. Duration. The transition period is:

- 1 Nov 95 - 1 Nov 97 for personnel entering the 3E9X1 career field. Individuals must complete formal in-resident training and the 5-level CDCs during this time-frame.

16.2. Target Group. Disaster Preparedness (3E9X1) and Force Management (3E6X1)

17. Transition Training Plan (TTP) Administrations. HQ AFCESA/CEOT developed and is currently monitoring the transition training plan.

17.1. Requirements. MAJCOMs will identify the personnel required for transition to meet mission needs. The STS (Part II, Section A of this CFETP) identifies certification/training requirements.

17.2. Training Methods.

- Transition will include formal in-resident training at the 366 TRS, Ft McClellan AL for personnel entering the 3E9X1 career field.
- Concurrently, existing 3E9X1 personnel will require training on Prime BEEF duties and responsibilities as outlined in the STS, (Part II, Section A of this CFETP).
- Training on Prime BEEF duties will be exportable through May 97, unless the individual has successfully graduated course J3AZR3E671 003, Prime Base Engineer Emergency Force NCO Course.

17.3. Certification Requirements. Certification will be monitored through formal testing and on-the-job training. Supervisors will use the AF Form 623, OJT Record, to monitor certification.

17.4. Program Management. To retain a Readiness AFSC, all TTP requirements are mandatory. HQ AFCESA/CEOT will manage the transition program to ensure mission needs are met and all required training is being accomplished.

18. Status Reporting. Base functional managers will report the transition training plan status to their MFM quarterly, by the fifth duty day of February, May, August, and November, for the entire transition training period. MFMs report TTP status to the AFCFM (HQ AFCESA/CEOT) semi-annually, by the 15th of May and November, for the entire transition training period.

PART II

SECTION A - SPECIALTY TRAINING STANDARD

1. Implementation. This STS will be used for technical training provided by AETC for the 3-level Readiness Apprentice course with class beginning 18 Sep 1997 and graduating 4 Dec 1997 and the 7-level Readiness Craftsman course with the class beginning 27 Oct 1997 and graduating 7 Nov 1997.

2. Purpose. As prescribed in AFI 36-2201, this STS:

2.1. Lists in Column 1 (*Tasks, Knowledge, and Technical Reference*) the most common tasks, knowledge, and technical references (TR) necessary for airmen to perform duties in the 3-, 5-, and 7-skill level.

2.2. Column 2 (*Core/Wartime Tasks*) identifies core tasks (specialty-wide training requirements) by an asterisk (*) for 5- and 7- skill levels or a double asterisk (**) for 7-skill level only. *As a minimum, trainees must complete all core and critical tasks for skill level upgrade.*

2.2.1. Wartime tasks are identified by a “/” followed by a proficiency code (“/b”). In response to a wartime scenario, these tasks will be taught in the 3-level course in a streamlined training environment.

2.2.2. Tasks identified by a diamond (◆) in column 2 are considered contingency/war tasks for both the 5- and 7-skill level and are extremely important to the career field. Equipment shortfalls at most locations however, have created problems with the actual hands-on certification of these tasks. In instances where required equipment is not available for instruction, completion of the task’s QTP is all that is required for upgrade and qualification training.

2.3. Provides **certification for OJT**. Columns 3A, B, C, D, and E are used to record completion of tasks and knowledge training requirements. If available, use automated training management systems to document technician qualifications. **Task certification of core and critical tasks** require a training completion date and initials of the trainee, trainer, and certifier. All non-core tasks require training completion date and initials of the trainee and trainer only.

2.4. Shows **formal training and correspondence course** requirements. Columns 4A, B, and C show the proficiency to be demonstrated on the job by the graduate as a result of training on the task/knowledge and the career knowledge provided by the initial skills training course, correspondence course, and read-ahead material. See CADRE/AFSC/CDC listing maintained by the unit training manager for current CDC listings.

2.5. Identifies tasks with **Air Force Qualification Training Packages (AFQTPs)**. A triangle (Δ) in column 4B2 indicates a QTP is under development for the particular task and a solid triangle (▲) indicates a QTP is currently available for the task. QTPs can be presented on CD-ROM, floppy-disk, paper-based, or video. When available, completion is mandatory for 5- and/or 7-level upgrade and qualification training.

2.6. Identifies **qualitative requirements**. Attachment 1 contains the *Proficiency Code Key* used to indicate the level of training and knowledge provided by resident training and career development courses.

2.7. Becomes a **job qualification standard (JQS)** for on-the-job training when placed in AF Form 623, Individual Training Record, and used according to AFI 36-2201. When used as a JQS, the following requirements apply:

2.7.1. Documentation. Document and certify completion of training.

2.7.1.1. Identify **current duty position requirements** by circling the subparagraph number or letter next to the task statement. Document task completion by annotating columns 3A, 3B, 3C, and 3D. *Note:* All entries shall be made in pencil.

2.7.1.2. Transcribing from old document to CFETP. Use the new STS to identify and certify all current and past task qualifications.

2.7.1.2.1. For tasks previously certified and still required in the current duty position:

2.7.1.2.1.1. For **core and critical tasks** the supervisor and certifier evaluates airman's current qualifications and validates airman's ability to complete the task. The supervisor and certifier then enter their initials and new certified date. (They are in essence "recertifying" the individual.)

2.7.1.2.1.2. For **non-core tasks**, the supervisor evaluates airman's current qualifications and validates airman's ability to complete the task. The supervisor then enters their initials in column 3D and a new training completion date in column 3B.

2.7.1.2.2. To **transcribe previous certifications for tasks not required in the current duty position**, carry forward only the previous completion dates (not the initials of another person). If and when these tasks become a duty position requirement, recertify with current date and supervisor's and trainee's initials.

2.7.1.3. Documenting Career Knowledge. When a CDC is not available, the supervisor identifies STS training references that the trainee requires for career knowledge and ensures, as a minimum, that trainees cover all mandatory items specified in AFMAN 36-2108, Utilization and Classification of Air Force Military Personnel. For two-time CDC exam failures, supervisors identify all STS items corresponding to the areas covered by the CDC. The trainee completes a study of STS references, undergoes evaluation by the task certifier, and receives certification on the STS. *NOTE:* Career knowledge must be documented prior to submitting a CDC waiver.

2.7.1.4. Decertification and Recertification. When an airman is found to be unqualified on a task, the supervisor shall erase previous certification and enter airman into qualification training. Appropriate remarks are entered on the AF Form 623a, On-The-Job Training Record Continuation Sheet, as to the reason for decertification. The individual is recertified using the normal certification process.

2.7.2. Training Standard. Tasks are trained and certified to the “go” level. “Go” means the individual can perform the task without assistance and meets the local requirements for accuracy, timeliness, and correct use of procedures. This equates to a “3c” in the proficiency code key. AFQTPs, when available, shall be used to identify Air Force standardized procedures. Local requirements for accuracy, timeliness and use of procedures shall be applied accordingly.

2.8. Is a guide for **development of promotion tests** used in the Weighted Airman Promotion System (WAPS). Specialty Knowledge Tests (SKTs) are developed at the USAF Occupational Measurement Squadron by senior NCOs with extensive practical experience in their career fields. The tests sample knowledge of STS subject matter areas judged by test development team members as most appropriate for promotion to higher grades. Questions are based upon study references listed in the WAPS catalog. Individual responsibilities are in chapter 14 of AFI 36-2606, United States Air Force Reenlistment, Retention, and NCO Status Programs. WAPS is not applicable to the Air National Guard or Air Reserve Forces.

3. Recommendations. Comments and recommendations are invited concerning quality of training AETC graduates receive. Reference this STS regarding changes and address your correspondence to 366 TRS/CC, 727 Missile Road, Sheppard AFB TX 76311-2254 or E-mail to 366trs@366trs.spd.aetc.af.mil. Correspondence can also be mailed to 782 TRG/TTS, 826 G Avenue, Suite 4, Sheppard AFB TX 76311-2857 or E-mail 782csil@spd.aetc.af.mil. A 782d customer service information line (CSIL) has been installed for the supervisor’s convenience to identify graduates who may have received over or under training on tasks/knowledge items listed in this STS. For a quick response to problems, call the CSIL at DSN 736-2574 any time (day or night).

BY ORDER OF THE SECRETARY OF THE AIR FORCE

Qualitative Requirements

Proficiency Code Key		
	Scale Value	Definition: The individual
Task Performance Levels	1	Can do simple parts of the task. Needs to be told or shown how to do most of the task. (Extremely limited)
	2	Can do most parts of the task. Needs only help on hardest parts. (Partially proficient)
	3	Can do all parts of the task. Needs only a spot check of completed work. (Competent)
	4	Can do the complete task quickly and accurately. Can tell or show others how to do the task. (Highly proficient)
Task Knowledge Levels *	a	Can name parts, tools, and simple facts about the task. (Nomenclature)
	b	Can determine step by step procedures for doing the task. (Procedures)
	c	Can identify why and when the task must be done and why each step is needed. (Operating principles)
	d	Can predict, isolate, and resolve problems about the task. (Advanced theory)
Subject Knowledge Levels **	A	Can identify basic facts and terms about the subject. (Facts)
	B	Can identify relationship of basic facts and state general principles about the subject. (Principles)
	C	Can analyze facts and principles and draw conclusions about the subject. (Analysis)
	D	Can evaluate conditions and make proper decisions about the subject. (Evaluation)
Explanations * A task knowledge scale value may be used alone or with a task performance scale value to define a level of knowledge for a specific task. (Example: "b" and "1b") ** A subject knowledge scale value is used alone to define a level of knowledge for a subject not directly related to any specific task, or for a subject common to several tasks. /X This mark is used in course columns to show that training is required but not given due to resource constraints. / Lower code (3c/2b) indicates that a task is being trained to a level that is lower than required. Specific tasks not identified with a symbol or proficiency code key (blank) indicates that no training is provided in the course or CDC. Major commands and/or units may establish scale values and combat training as dictated by mission requirements.		

Attachment 1

Note 1: Trainers are responsible for annotating references to identify current sources pending STS revision.
Note 2: Underlined training references are commercial publications or other publications essential for enlisted speciality training and mission accomplishment.
Note 3: Task knowledge gained at Basic Military Training (BMT) will not be repeated at the resident training.
Note 4: Completion of the 7 level Read-ahead Material (RAM) for J3ACP3E971 000, Readiness Management Craftsman resident course, must be successfully completed (demonstrated by testing) by seven-level candidates prior to attending.
Note 5: QTPs may be provided through multiple delivery systems (paper-based, CD-ROM, or video). When delivered, completion is required for upgrade or qualification. When available, QTPs will be identified in the Air Force Index 8.

Note 1: General Contingency Responsibility (CDC 3E050), must be successfully completed by all CE specialties.

Note 2: Personnel retraining from one CE AFSC to another CE AFSC are not required to complete this CDC.

Note 3: Completion of the apprentice course meets the initial requirements for Category I, classroom training.

Note 4: Completion of CDC 3E050 may be used as a substitute for Category I annual requirements (effective one year following the completion of the CDC).

SECTION B - COURSE OBJECTIVE LIST (COL)

4. Measurement. Measurement of each objective is indicated as follows:

- **W** indicates task or subject knowledge which is measured using a written test.
- **PC** indicates required task performance which is measured with a performance progress check.
- **PC/W** indicates separate measurement of both knowledge and performance elements using a written test and a performance progress check.

5. Standard. The standard is 70% on written examinations. Standards for performance measurement are indicated in the objectives and delineated on the individual progress checklist. Instructor assistance is provided as needed during the progress check, and students may be required to repeat all or parts of the behavior until satisfactory performance is attained.

6. Proficiency Level. Most task performance is taught to the “2b” proficiency level which means the student can do most parts of the task, but does need assistance on the hardest parts of the task (partially proficient). The student can also determine step by step procedures for doing the task.

7. Course Objective List. These objectives are listed in the sequence taught by Block of Instruction.

7.1. Initial Skills Course. A detailed listing of the initial skills course objectives may be obtained by written request to 366 TRS/DO, 727 Missile Road, Sheppard AFB TX 76311-2254.

7.2. 7-Skill Level Course. A detailed listing of the Readiness Craftsman course objectives may be obtained by written request to 366 TRS/DO, 727 Missile Road, Sheppard AFB TX 76311-2254.

SECTION C - SUPPORT MATERIALS

8. The following list of support materials is not all inclusive; however, it covers the most frequently referenced areas.

- Air Force Index (AFIND) 11, Index of Disaster Preparedness and Readiness Training Packages, lists training packages applicable to Air Force, Air Reserve, and Air National Guard Readiness organizations and/or Civil Engineer Readiness Flights.
- Readiness Training Packages (RTPs) are written and coordinated by the Contingency Support Plans Division (HQ AFCESA/CEXR), 139 Barnes Drive Suite 1, Tyndall AFB, FL 32403-5319; and sent to SAF/AADP, 170 Luke Avenue, Suite 300, Bolling AFB DC 20332-5113, for publication and distribution. Send any comments or suggestions on this index or any DPTPs/RTPs directly to the OPR.
- RTPs, users will establish requirements and submit requisitions in the short-title format (i.e., RTPA4, etc.) using AF Form 764A. Process these, distribution category "F", through local publications distribution office. These publications can also be downloaded off the HQ AFCESA Internet homepage under the Contingency Support Directorate.
- New, revised, and obsolete RTPs are announced in Part 1 of the AF Publishing Bulletin.

8.1. Air Force Qualification Training Packages.

CDC 47201, 02, 03, 05	HAZMAT Levels I, II, III, and V	Dec 94

12. Exportable Courses/Information.

13. Courses Under Development/Revision.

Course Number	Title	Date
CDC 3E951	Readiness Journeyman	Dec 97
JBACR3E971 000	Readiness Management Craftsman course – Part A (exportable) version 1.0	Aug 97
CDC 3E050	General Contingency Responsibilities	Dec 98

SECTION E - MAJCOM UNIQUE REQUIREMENTS

“There are currently no MAJCOM unique requirements. This area is reserved.”

SECTION F - HOME STATION TRAINING

14. Purpose. The purpose of this section is to identify the tasks, training references, and training sources available in support of contingency/wartime training. Training ranges from knowledge-type training conducted in a classroom to task-oriented (hands-on) training conducted in the field. The tasks are general in nature and pertain to all civil engineer career fields. All civil engineer personnel are expected to receive this training even though the tasks may not be directly related to their AFS but support other CE AFSs.

14.1. Home Station Training (HST) Definition. HST is defined as training that is conducted at the individual's home station.

- Category 1 (CAT-1) training consists of knowledge-level training such as Prime BEEF orientation, field sanitation, and health/hygiene. CAT-1 training is normally accomplished through briefings and the use of videos and other training aids.
- Category 2 (CAT-2) training is primarily task-oriented such as weapons training, hard-back tent construction, and convoy security. This training, obviously, will be conducted in the field during bivouacs.

14.2. Training References.

14.2.1. AFI 10-210, Prime Base Engineer Emergency Force (BEEF) Program. Chapter three of AFI 10-210 identifies the Prime BEEF annual HST requirements. This document is located in the Readiness Flight. Figure 14.1 is a list of HST CAT-1 and CAT-2 training.

14.2.2. Prime BEEF Wartime Task Standard (WTS). The WTS lists basic wartime skills, knowledge, and the major common contingency/wartime tasks Prime BEEF teams will be required to perform. The WTS identifies the AFSs associated with each task, required resources to accomplish the task, and the maximum time (under optimum conditions) expected to complete the task. The document also identifies the lead AFS on each task. This document is located in the Readiness Flight. All tasks, skills, and knowledge required in the WTS are included in the STS portion of this CFETP.

14.2.3. AFPAM 10-219, Contingency and Disaster Planning. These documents assist in home station training and contingency responses. They replace the AFP 93-12 series of planning documents. There will be ten volumes to the AFPAM when completed and will be available on the Air Force Electronic Publications Library (AFEPL). The following is a list of the volumes making up AFPAM 10-219:

Volume	Title
1	Contingency and Disaster Planning
2	Preattack and Predisaster Preparations
3	Postattack and Postdisaster Procedures

4	Rapid Runway Repairs
5	Bare Base Conceptual Planning Guide
6	Planning and Design of Contingency Air Bases
7	Expedient Construction Methods
8	Prime BEEF Manager's Guide
9	Establishing and Maintaining Contingency Air Bases
10	Engineer Wartime Task Standard

14.2.4. Air Force Catalog 36-2223. Lists additional training/educational opportunities available for civil engineer personnel. This catalog contains information on formal education and training courses. The catalog is updated quarterly. The catalog is on the AFEPL. Your unit training manager will maintain a hard-copy of this catalog.

14.2.5. ConTest. ConTest is an interactive computer-based testing program designed to evaluate a student's knowledge of contingency topics. ConTest is used to determine student's comprehension following HST CAT-1 classes. ConTest can also be used by students who "challenge" the requirement to attend CAT-1 classes due to their prior experience, existing knowledge on the subjects, or previous attendance to training classes. Members successfully passing a ConTest test will be given credit for meeting the required training. ConTest is distributed on CD-Rom disk and is maintained by the Readiness Flight. *ConTest is not intended to replace initial HST requirements for new member, nor is it intended to replace CAT-2 training.*

14.2.6. Readiness Training Package (RTP). RTPs are lesson plans for HST lessons. The RTPs are intended for those people who teach any area of HST. The index for the RTPs is located in AFIND 11. The RTPs are also on the Air Force Civil Engineer Support Agency (AFCESA) home page. The internet address for this information is <http://www.afcesa.af.mil>.

14.2.7. Other Documents. AFH 10-222, Bare Base Development, Vols. 1 & 2 are pocket guides providing information on bare base development for all AFSs. AFH 10-222, Vol 4, Air Force Environmental Hand-Book for Contingency Operations, was developed to assist the environmental career field (3E4X3) on environmental quality issues during contingency and training operations. The hand-book can be used by any AFS who works closely with environmental issues. AFH 10-222, Vol 3, Guide to Civil Engineer Force Protection.

14.2.8. AFCESA/CEX maintains a comprehensive listing of audiovisual products that support the Engineer Readiness program. To view this listing as well as gain information on how to order specific audiovisual products, please consult the AFCESA home page.

14.3. Ancillary Training.

14.3.1. Team Exercise Sites. All civil engineer personnel who fill critical Unit Type Code (UTC) positions will receive team qualification at Silver Flag Exercise Sites (SFES) with the exception of members on headquarters staff augmentation UTCs, pavement evaluation UTCs, and generator repair and maintenance UTCs. There are currently three active SFES in the world today. They are located at Tyndall AFB, FL; Ramstein AFB, Germany; and Kadena AFB, Japan. Personnel in critical UTC positions will be qualified at least every two years on the elements listed in table 3.3 of AFI 10-210. The Air Reserve Components (ARC) will be qualified at least every three years.

14.3.2. Regional Equipment Operator Training Site (REOTS) Course. The purpose of this course is to elevate the proficiency of Pavement and Equipment personnel (3E2X1) in the operation on the grader, bull-dozer, excavator, and 4-CY front-end-loader. 3E2X1 personnel should attend REOTS shortly after upgrade to the five-skill level. Supervisors need to schedule their people for attendance through their unit training manager and budget through the unit resource manager.

HOME STATION TRAINING
Category 1 - Classroom Training

Item	Task
1.	Prime Beef Orientation
1.1.	The Individual's Role
1.2.	Members Placement into the Prime BEEF Organization
1.2.1.	Organization Overview
1.2.2.	Training
1.2.3.	Equipment
1.2.4.	Operating Concepts
1.2.5.	Contingency Mission
1.2.5.1.	MAJCOM
1.2.5.2.	Unit
2.	Field Sanitation and Health
2.1	Field Sanitation
2.2	Buddy Care Procedures
2.3	Self Aid
2.4	Personal Hygiene
2.5	Control of Communicable Diseases
2.6	Kitchen and Mess Sanitation
2.7	Extreme Climates
2.8	Field Hygiene
2.9	Self Aid and Buddy Care
2.10	Water Purification
3.	Explosive Ordnance Reconnaissance
3.1.	Recognize Ordnance
3.2.	Describe Ordnance
3.3.	Report Location of Ordnance to Appropriate Control Center
4.	Expedient Methods
4.1.	Expedient Beddown
4.1.1	Harvest Eagle
4.1.2	Harvest Falcon
4.1.3.	Layout a Base
4.1.4.	Theater Utility Systems
4.1.5.	Harden Facilities
4.2.	Expedient Field Construction
4.2.1.	Construct Hardback Tent
4.2.2.	Field Latrines
4.2.3.	Berms and Dikes
4.2.4.	Field Utility System

Figure 14.1

Item	Task
4.2.5.	Wood Frame Buildings
4.2.6.	Modular Construction
4.2.7.	Bridges and Culverts
4.3.	Expedient Repair of:
4.3.1.	Electrical
4.3.2.	Plumbing
4.3.3.	Roads
4.3.4.	Buildings
4.3.4.1.	Shoring
4.3.4.2.	Scabbing
4.3.5.	Runway
4.3.6.	Facility
4.3.7.	Other Utilities
4.4.	Expedient Destruction/Base Denial
4.4.1.	Non Explosive
4.4.2.	Explosive
5.	Security Training
5.1.	Physical
5.2.	Personal
5.3.	Work Party
5.4.	Convoy
5.5.	Air Base Ground Defense (ABGD)
5.5.1.	Standoff Techniques
5.5.2.	Defense Positions
5.5.3.	Movement to Defensive Positions
5.5.4.	Fire and Maneuvering
5.5.5.	Reacting to Attacks

Figure 14.1

HOME STATION TRAINING
Category 2 - Hands-on Training

Item	Task
1.	Government Vehicle and Equipment Operator Training
1.1.	Contingency Vehicle Qualifications (AFI 10-210, Chapter 3)
1.2.	Equipment Training (AFI 10-210, Table 3)
2.	NBC Defense Training
2.1.	NBC Defense Policy
2.2.	USAF Alarm Signals and Actions
2.3.	Personal Protective Equipment (PPE)
2.4.	Contamination Control
2.5.	Lethal Chemical Agents and Defense Actions
2.6.	Biological Warfare Agents and Defense Actions
2.7.	Mission Oriented Protective Posture (MOPP) Levels
2.8.	Attack Reporting Procedures
3.	Weapons Training
3.1.	M-16
3.2.	.38-cal.
3.3.	9mm
3.3.1.	Courier
3.3.2.	Guard
3.3.3.	In-Flight Security
4.	Expedient Methods
4.1.	Beddown
4.1.1	Force Beddown
4.1.1.1.	Bare Base Assets
4.1.1.2.	Use Impoverished Materials for Construction of:
4.1.1.2.1	Buildings
4.1.1.2.2	Facilities
4.2.	Field Construction
4.2.1.	Using Normal Construction Equipment and Materials:
4.2.1.1.	Tent, Hard Back
4.2.1.2.	Field Latrines
4.2.1.3.	Berms and Dikes
4.2.1.4.	Field Utility System
4.2.1.5.	Wood Frame Building
4.2.1.6.	Pre-Engineered Building
4.2.1.7.	Modular Construction
4.2.1.8.	Bridge and Culverts

Figure 14.1

Item	Task
4.3.	Repair and Destruction Methods
4.3.1.	Plan and Use Expedient Techniques.
4.3.2.	Electrical
4.3.3.	Plumbing
4.3.4.	Roads
4.3.5.	Buildings
4.3.5.1.	Shoring
4.3.5.2.	Scabbing
4.3.6.	Rapid Runway Repair (RRR)
4.3.6.1.	Crush Stone
4.3.6.2.	AM-2 Matting
4.3.6.3.	Fiberglass Mat
4.3.6.4.	Spall Repair
4.3.6.5.	Command and Control
4.3.6.6.	Minimum Operating Strip
4.3.7.	Non-Explosive Base Denial Expedient Destruction for:
4.3.7.1.	Base Utilities
4.3.7.2.	Base Facilities
4.3.7.3.	Engineering Equipment
5.	Field Training -- AFI 10-210, Table 2
5.1.	Bivouac-Practice Contingency Skills:
5.1.1.	Camp Layout
5.1.2.	Vehicle Operations
5.1.3.	Erection of Bare Base Assets
5.1.4.	First Aid
5.1.5.	Field Sanitation
5.1.6.	Multiskilling
5.1.7.	Nuclear Defensive Techniques
5.1.8.	Biological Defensive Techniques
5.1.9.	Chemical Defensive Techniques
5.1.10.	Personal Security
5.1.11.	Work Party Security
5.1.12.	Convoy Security
5.1.13.	Defensive Techniques to Support and Augment Security Police
5.1.14.	Coordination and Communication Procedures
	NOTE: For further explanation of Home Station Training Category 1 or 2, see AFI 10-210
